DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

2. Claims 1, 12 and 23 are rejected under 35 U.S.C. 102(e) as being anticipated by Huo et al (US 6,282,305).

As to claims 1, 12 and 23, Huo et al disclose a method of correcting for a tilt in a mammogram, the method comprising: classifying pixels as either likely fat or likely not-fat (column 14, lines 6-26); identifying a candidate tilt (column 14, lines 6-26); and Calculating a histogram of the likely fat and the likely not-fat pixels at the Candidate tilt (column 14, lines 6-25); and evaluating a quality of the candidate tilt based on features of the histograms of pixel values in the fat and the dense tissue classes (column 14, lines 6-25).

Allowable Subject Matter

3. Claims 2-11, 13-22 and 24-25 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
